

CloudNine Explore™

Enables your legal teams, investigators and auditors to investigate issues, assess risk, confirm compliance and begin early case assessment quickly and easily to identify the important data to complete your organization's objectives.

Obtain insight into “big data” quickly for investigations, compliance and early case assessment with CloudNine Explore.

CloudNine Explore Innovation:

- **Explore** - Navigate through data to identify risk, determine scope and control cost.
- **Assess** - Inspect and review data using automated and in-person processes.
- **Protect** - Securely load, ingest and preserve data needed for ongoing investigation or litigation.
- **Deliver** - Provide information as required for legal production or further investigation.

Benefits of CloudNine Explore

- Alert corporate governance to possible compliance, ethics, and even criminal issues before they impact your business.
- Evaluate risk and potential cost of litigation at the earliest possible point.
- Avoid costly and time-consuming production of redundant and irrelevant documents.
- Reduce the risk of producing privileged or protected content.

CloudNine Explore Pricing

- Annual subscription bundles by Agent (one Agent per Core, two Agent minimum).
- Burst mode for exceeding subscription level without long-term increase.
- Monthly rental with conversion to subscription option.

CloudNine Explore Case Study

Issue - Our client needed a culling and filtering solution that could keep up with the vast amounts of data being processed for their corporate and law firm clients.

Solution - CloudNine Explore was implemented to control costs and to improve efficiency and scalability.

Results - In a case with 90 million records, CloudNine Explore reduced document review corpus by 85%.

About CloudNine

Every day, CloudNine Software helps our 1,000+ clients answer their most pressing discovery questions.

Established in 2002, CloudNine has offices in Houston, Raleigh and Dayton with remote employees throughout the USA.

CloudNine Differentiators

FLEXIBILITY	ADAPTABILITY	COMMUNITY	TECHNOLOGY
On-premise, mobile, cloud or hybrid deployment.	End-to-end or complementary applications.	Hundreds of experts around the world ready to help.	Easy to deploy, manage and use.

“In making technology decisions, performance is the primary driver every time. CloudNine Explore was very flexible and easy to scale. We started off with a small installed footprint, and as we doubled and then tripled our throughput, we were easily able to expand the application to meet our needs.”
